

Innovation Voucher Public Summaries

March 25, 2024

Audiance, Inc. | East Greenwich | \$75,000 | Manufacturing Innovation Voucher | Audiance will use the Voucher to develop new, scalable cell fabrication strategies to produce long-lasting, 3.6V, anatomically sized power supplies for any active implantable medical devices (AIMDs).

US Extruders (USX) | Westerly | \$75,000 | Manufacturing Innovation Voucher | The voucher funding will allow USX to design, engineer and build a mechanical force called a RAM stuffer. USX will design, engineer and build a prototype that will minimize the footprint of the design, maximize the efficiency of the extruder, and create an optimal sensing system of extrusion control.
